Financial Services Regulation in the European Union: "New Politics" after the Crisis?

Abstract:

This presentation will examine the 'internal' and 'external' regulatory response of the European Union (EU) to the global financial crisis, addressing the questions of whether, how and why the global financial crisis has changed the existing politics of financial services regulation and resulted in the emergence of a 'new politics'. The internal dimension will explore the politics of the new or revised financial rules adopted or proposed by the EU. The external dimension will look at the EU action in international regulatory fora in the wake of the global financial crisis.
